

ENVIRONMENT POLICY

Taking “sustainable development” concepts as its starting-point, Çolakoğlu® Metalurji A.Ş. conducts all of its activities and operations with a concern for minimizing their environmental impact and for playing a role in protecting the environment. With this vision in mind, we abide by the following principles in our efforts to constantly improve our environmental performance:

- Comply with all applicable national laws, regulations, and other administrative provisions as well as with international treaties, conventions, and agreements.
- Operate an environmental management system and meet all of its requirements.
- Reduce waste generated during our operations at source and recover as much usable material from it as is possible.
- Keep abreast of advances in technology and make our operations as efficient as possible so as to reduce losses.
- Minimize natural resource use by constantly improving operational productivity.
- Raise all of our employees’ and other stakeholders’ awareness of the possible environmental impact of our operations and products.
- Constantly improve our environmental performance and take environmental impact issues into account when considering new investments.

We hereby declare that, working together with our employees, we will continue our never-ending efforts and investments in order to fulfill the requirements both of this policy and of our environmental responsibilities.
